

re-bounce®

Levelling, shock- and sound absorbing underlay for indoor and outdoor sports surfaces.

Description

re-bounce® is a shock absorbing underlay for indoor and outdoor sports surfaces, more specific for point elastic sports surfaces.

The product consists of open-cell flexible polyurethane trim foam, bonded together with a binder.

Advantages

- Reduces indoor floor vibrations, noise and echoes
- Uniform shock absorption and vertical deformation over the surface
- Ageing resistant during the lifetime of the surface
 - The comfort properties remain constant over time
 - The foam does not pulverise, rot or harden
- Good dimensional stability
- Very easy to install

Technical information

Material:	Environmentally friendly, recycled and recyclable open-cell flexible polyurethane foam.
Size:	Roll or in preferred length. 1 Roll is 1,5 x 30 m = 45 m ² . Thickness: 5 mm.
Colour:	Black.
Art. No.:	• BK3000 (1 roll)
